DETAILED ACTION

Election/Restrictions

Claims 1- 22 are pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 17-22, drawn to a semiconductor device, classified in class 257, subclass 328.

Group II. Claims 1-16, drawn to process of making a semiconductor device, classified in class 438, and subclass 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of the group I invention could be made by a materially different process from that of the group II invention, for example, rather than epitaxially forming a Si film on an exposed side of the relaxed SiGe block, the strained Si film may be selectively deposited by CVD process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2818

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(1).
